Fri, 07 Dec 2018 22:05:00 GMT Agilent SureCycler 8800 - What Is Real-Time PCR? In conventional PCR, the amplified DNA product, or amplicon, is detected in an end-point analysis. In real-time PCR, the accumulation of amplification product is measured as the reaction progresses, in real time, with product quantification after each cycle. Tue, 04 Dec 2018 09:37:00 GMT What is Real-Time PCR (qPCR)? | LSR | Bio-Rad - Polymerase chain reaction (PCR) is a method widely used in molecular biology to make many copies of a specific DNA segment. Using PCR, a single copy (or more) of a DNA sequence is exponentially amplified to generate thousands to millions of

more copies of that particular DNA segment. PCR is now a common and often indispensable technique used in medical laboratory and clinical laboratory ...
